

# Kantar Polska: 7 in 10 Poles want their government to vote in favour of ending EU carbon pollution by 2050

*Support for Green Deal flowering even in Europe's 'coal country'*  
**80% support the EU's Green Deal**

*The European Union is right now discussing a long-term plan to tackle the climate crisis by cutting carbon pollution, and investing in infrastructure and renewable energy, while creating new jobs. It is called "Europe's Green Deal". Based on what you know, do you support a Green Deal for Europe?*

*Poland has blocked Europe from agreeing to cut carbon pollution to zero by 2050, which scientists say it is necessary to avoid dangerous climate change. Next week EU leaders are voting on the proposal again. Do you agree that the Polish government should stop blocking this agreement, and support ending carbon pollution by 2050?*

*Poll of 800 Polish citizens conducted by phone on December 9th, 2019 by Kantar Polska. See full results here (in Polish): <https://avaazimages.avaaz.org/PL2050poll-full-kantar.pdf>*
